PJ Networks

Re: Testimonial

To Whom It May Concern:

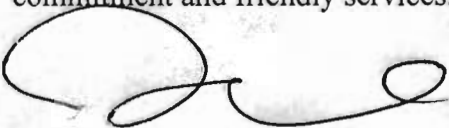

Although I was very pleased with my prior IT consultant, I was having consistent problems with his response time in taking care of my IT needs in a timely manner. I was then blessed to have come across PJ Networks' open house, and enquired about their help as a back up IT consultant. PJ and his Associates - in very short order - personally came to my office, reviewed my office IT situation, and came up with several intriguing proposals for increasing my office computer efficiency. It quickly became apparent that it was in my best business interest to have PJ Networks as my primary IT consultant. We have never regretted this decision.

PJ Networks spent an enormous amount of time upgrading my office computer system with a new server, new e-mail system, integrating my off site capabilities and lap tops with my main computers and on and on. For the first time we were able to fully access the computers while away from the office. IT problems we had had for years were suddenly resolved.

PJ Networks kept going above and beyond the call of duty. For instance, I was in desperate need to upgrade my document production processing, and had for years looked for someone to assist me in doing so. PJ Networks mastered this unique software program, and worked closely and weekly with my Paralegal in making my document processing ever so much more efficient. In another instance they helped me set up a special computer for my autistic son.

In the mean time PJ Networks has been incredibly prompt in responding to the bugs which inevitably creep up when substantial changes are made to an office computer network and system. On top of this, PJ Networks is a real pleasure to work with. They take the time to explain things, and even had an educational IT session with my office staff

Everyone at this office greatly appreciates PJ Networks terrific knowledge, service commitment and friendly services. They come most highly recommended!!
